

Solution for Stone Quarries

The background of the slide is a photograph of a large stone quarry. The quarry face is composed of dark grey and black rock, with some lighter, tan-colored sections. The rock is layered and shows signs of being quarried. At the top of the quarry, there is a layer of reddish-brown soil and some sparse vegetation. The sky is a clear, light blue. A white text box with a red border is overlaid on the right side of the quarry face.

Realization of the EU-
Identification Directive
